Revision 2 ❖ September 8, 2010

CONFORMS TO THE GLOBALLY HARMONIZED SYSTEM (GHS), ANSI Z400.1-2004, EU DIRECTIVE 91/155/EEC & 99/45/EC, OSHA 29 CFR 1910.1200, NOHSC:2011(2003), AND CANADIAN CPR

Special Equipment and Precautions *Use water spray to cool fire exposed containers, as contents can rupture violently from heat developed pressure. Firemen should wear self-contained breathing apparatus.*

Special Explosion Hazards *CORROSIVE LIQUID.*

Autoreactivity / Oxidizing Properties *Not available*

Section 6

● ACCIDENTAL RELEASE MEASURES ●

Section 6

Personal Precautions *Use personal protection recommended in Section 8. Isolate hazard area and deny entry to unnecessary and unprotected personnel.*

Environmental Precautions *Keep out of drains, sewers, ditches, and waterways.*

Containment Procedures *Released content may be contained with absorbent pads, booms, and/or absorbents suitable for water-based materials.*

Cleanup Procedures *For small spills dilute with water and mop up, or absorb with an inert material and place in an appropriate waste disposal container. If necessary, neutralize the residue with a dilute solution of acetic acid. For large spills stop leak if without risk. Use water spray to reduce vapors. Call for assistance on disposal and cleanup.*

Other Information *The North American Emergency Response Guidebook, the Australian Dangerous Goods-Initial Emergency Response Guide (SAA/SNZ HB 76), or similar resources providing emergency response information for dealing with accidents, spills, leaks, and/or fires involving dangerous goods.*

Prohibited Materials *Combustible absorbent material such as sawdust, use of equipment that may cause sparking.*

Reporting Requirements *Report releases that reach surface water or groundwater in any amount. Spills, leaks, and overfills from a regulated underground storage tank should also be reported. Reportable quantities for spills onto the ground depend on site conditions, such as the type of soil and the type of material spilled, and Federal and local agencies often have different reportable quantities. If you are unsure of your reporting requirements contact the regulating agency in your area.*

Section 7

● HANDLING AND STORAGE ●

Section 7

Precautions for Safe Handling and Use *KEEP OUT OF THE REACH OF CHILDREN.*

Storage Requirements and Conditions *Keep containers tightly closed and stored in a well-ventilated place. Store away from incompatible materials.*

● DISPOSAL CONSIDERATIONS ●

Section 13

Waste Disposal	<i>Hazard characteristics and regulatory waste stream classification can change with product use and location. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste material must be disposed of in compliance with the respective national, federal, state, and/or local regulations.</i>
Waste Disposal of Packaging	<i>Consult with local landfill to determine if empty small containers can be disposed of regular trash pickup.</i> <i>For disposal of large containers (typically 10 gallon or larger), or for containers not suitable for landfill, containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition; they may explode and cause injury or death. Do not attempt to clean since residue is difficult to remove. Empty drums should be completely drained, properly bunged, and promptly returned to a drum reconditioner. All other containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.</i>
Landfill Precautions	<i>Not Available</i>
Incineration Precautions	<i>Not Available</i>
